Summary

Final-year Information Technology student at Thuyloi University (HCMC) seeking a Full-Stack Software Engineer Internship. Experienced in building and deploying production-grade web applications with React, Node.js, and Python FastAPI, augmented by modern AI-assisted engineering workflows (Cursor, Claude Code, Google Antigravity). Genuine passion for software engineering, highly coachable, and eager to learn from senior engineers through rigorous code reviews. Ready to dedicate 100% energy and commitment to write clean, reliable code and create meaningful value for the company.

Education

Thuyloi University — Ho Chi Minh City, Vietnam

Bachelor of Science in Information Technology – 4th Year (Expected Graduation: 2027) — *2023 – Present*

- **Relevant Coursework**: Data Structures & Algorithms, Object-Oriented Programming, Database Systems (DBMS), Web Application Development, Software Engineering, Computer Networks
- **English Proficiency**: Certified CEFR B1 Standard (University Exit Benchmark)

Projects

Tuong Tan TOEIC – 4-Skill EdTech Platform — Jan. 2026 – Present

Full-Stack Developer | Production Flagship Project — *Live Demo | github.com/DangAnhTuong/tuong_tan_toeic*

- **Tech Stack**: React 18, Node.js (Express), MongoDB, TailwindCSS, Vite, Web Audio API, JWT Auth, Nginx, Linux VPS.
- **Learning Engine**: Developed an extensive TOEIC preparation platform serving 18,200 ETS practice questions with structured 4-part explanations, 11,785 dictation audio sentences with character-level text diffing, and 83 SM-2 spaced repetition sets.
- **Exam Simulator**: Built a 100vh single-frame ETS exam room featuring 200-question interactive bubble sheets, single-sentence waveform audio streaming, and sub-second auto-advancing input mechanics.
- **Study Notebook & Gamification**: Implemented an automated mistake review notebook for targeted practice, paired with daily streak tracking, XP progression, and a real-time 1v1 multiplayer arena.
- **Security, Payment & CI/CD**: Integrated Google 1-Click OAuth 2.0, automated VietQR payment webhooks for instant 120-day VIP provisioning, and deployed automated 5-step CI/CD pipeline on Ubuntu Linux VPS with Nginx and SSL.

AI-Powered English Learning Platform — Jan. 2026 – Present

Full-Stack Developer | Personal Project — *Live Demo | github.com/DangAnhTuong/ai-english-learning-platform*

- **Tech Stack**: React 19, Node.js (Express), Python (FastAPI), MongoDB, Redis, WebSockets, Docker, Nginx.
- **Decoupled Backend**: Designed a multi-tier backend where Node.js manages user data, authentication, and chat history while Python FastAPI handles compute-heavy real-time speech processing.
- **Real-Time Voice Streaming**: Integrated Deepgram STT and OpenAI API via WebSockets for low-latency voice evaluation (<1.5s) and automated pronunciation scoring.
- **Authentication & RBAC**: Implemented secure JWT authentication with refresh token flow, Google OAuth2, and granular Role-Based Access Control (RBAC) for learners and admins.
- **DevOps & Deployment**: Containerized application stack using Docker Compose and Nginx Reverse Proxy on Linux VPS; optimized caching headers for static SPA delivery.

Tuong Hotel – 3D Showcase & Reservation System — June 2025 – Aug. 2025

Frontend Developer | Personal Project — *Live Demo | github.com/DangAnhTuong/tuong-hotel*

- **Tech Stack**: React 19, Three.js (@react-three/fiber), Ant Design 5, HTML5, CSS3, i18next, Netlify.
- **3D Interactive Graphics**: Built a luxury hotel showcase featuring interactive 3D WebGL rendering with Three.js, room showcases, dining menus, and tour booking reservation flows.
- **Localization & UI**: Integrated Ant Design 5 components, custom CSS keyframe animations, and i18next for seamless English/Vietnamese language switching.
- **Asset Optimization & CI/CD**: Optimized 3D model geometry and asset loading to maintain steady 60 FPS rendering; set up automated continuous deployment via Netlify.

Technical Skills & Competencies

Frontend: React 19 / 18, Next.js, TailwindCSS, Three.js (@react-three/fiber), JavaScript (ES6+), TypeScript, HTML5, CSS3, Ant Design, Web Audio API
Backend: Node.js (Express), Python (FastAPI), RESTful APIs, WebSockets, Mongoose, JWT Auth, OAuth 2.0, RBAC
Programming Languages: JavaScript (ES6+), TypeScript, Python, C++, Java, SQL
Database & Storage: MongoDB, PostgreSQL, MySQL, Redis
AI-Assisted Engineering: Cursor IDE, Claude Code, Google Antigravity, OpenAI Codex, Prompt Engineering
DevOps & Cloud: Docker, Docker Compose, Nginx Reverse Proxy, Linux VPS (Ubuntu), PM2, Git, GitHub, Vercel, Netlify, CI/CD
Software Practices: Clean Architecture, Responsive Web Design, Component-Driven Development, Agile / Scrum, Code Review
Languages: English (CEFR B1 Certified)
